

BEE BEE ELECTRICALS & ELETRONICS PVT LTD

An ISO 9001 : 2015 Certified Company

Earth Fault Relay

Bee Bee Earth Fault relay consists of microprocessor-based circuitry and inbuilt precise & instantaneous sensors that sense the Voltage, current at each pulse and if there is ant leakage of current at ground source it processed through the controller and able to trip the system.

Features

- Microprocessor Based Intelligent Logic Control:
- Effective & precise control.
- Latest state of art technology.
- Superior performance
- Simple and reliable construction
- High Stability on external faults
- Sensitive High-speed protection on internal faults
- Balanced and restricted earth fault.
