

DIRECT ONLINE STARTER

Bee Bee make **Direct On Line** Starters is digitally controlled by Microprocessor Based Intelligent Logic Circuit that provides precise control & extensive motor protections with LED indication. This starter is one of its own kinds.

Starter is made up with heavy duty components & sensors that monitor current and voltage of the motor and processing it further through a microcontroller based intelligent circuitry and delivering its desired output.

This starter is highly reliable & suitable for wide range of agriculture & industrial applications. It offers complete motor protection against overload, single phasing, & severe unbalanced voltages conditions, under voltage & over voltage conditions.

Salient Features:

- Rugged Schneider Contactor with wide voltage band is designed for exceptional endurance.
- Ergonomic design with aesthetic looks.
- Hum – Free.
- Fitted with current & voltage Sensors that provide
 - Over Load Protection
 - Phase Loss Protection
 - Phase Imbalance Protection
 - Under Voltage Protection
 - Over Voltage Protection
 - Dry Run Protection
- Easy & quick mounting.
- Encapsulated coil to with-stand wide voltage fluctuations.
- LED indications

Applications

- ❖ Motors
- ❖ Pumps
- ❖ Fans
- ❖ Cooling Compressors
- ❖ Stirrers and mixers

Power	Up to 15 H.P
Starter Type	Direct-On-Line Starter
Voltage	415 VAC
Coil Voltage	415 VAC
Current Rating	Depends upon HP
Phase	Three Phase
Frequency	50 Hz
Current Type	AC
Material	Mild steel Powder Coated
Brand	BEEBEE
